## Entropic Resolve

Atrails Knight Sanderson  
05/09/2025

What would heat death entail? Some scientists argue that time and space will be ruptured via the acceleration of galaxies towards entropy; Eventually one will break time and space (I agree in the possibility of this creating a rupture very great but not that it would cause a universal singularity resolve).

What will happen in the event of maximum entropy?

This is an image of a flatlined plane, this would mark a quantum electrospatialmaggamnetic event throughout all of the universe.

Since there is no more force on the mass-energy side, the force would reciprocate a quantum spatialgamnetic event. There would still be space-time ripples unaffected by the cold.

There's too much spatialgamnetic energy unaccounted for. The end of a flow in matter is an equal and opposite reaction on the antimatter end, which I imagine is quantum\*

This flatlined plane would behave the way all flatlined planes we know of, this would form its own encompassed conceptual event.

Such as what time has entailed:  
A planar ripple.

\*Anti-Matter Would Require A  
Quantum Catalyst, Perhaps  
Spatialgamnetic

What the plane of  
time has entailed:

## Spatialgamnetic Anti-Matter

Atrails Knight Sanderson

05/09/2025

Matter as we know it has Mass/gravity/  
Energy and takes up Space.

This encompasses

[M] [E] [S] T

While matter has M & E it takes up S, this is  
why I leave room for two potential fields:  
Matter, it is an excitation of the Quantum  
Electrospatialmagnetic Field and/or  
Quantum Electromagnetic Field; All of  
matter.

Anti-Matter may be something which takes  
up Energy but has Space and Time

M [E] [S] [T]

presenting Anti-Matter as an excitation of  
two potential fields:

The Quantum Electrospatialgamnetic and/or  
the Quantum Spatialgamnetic field

## Spatialgamnetic Anti-Matter

Matter's excitation of the quantum  
electromagnetic field has proven:

[M] [E] [S] T

GRAVITY

MATTER

Anti-Matter's excitation of the  
quantum spatialgamnetic field  
has proven:

M [E] [S] [T]

ANTI-MATTER

ANTI-GRAVITY

These models show how matter/anti-matter  
while exciting the quantum electromagnetic  
field/quantum spatialgamnetic field gives  
way to gravity/anti-gravity.

# The Entropic-Syntropic Pendulum Theory

Atrails Knight Sanderson

05/09/2025

If you consider the inductor and conductor of the universe on a course that which doesn't destroy itself but rearranges (a hyper-dimensional pendulum) then you can imagine an eternal amount of time forwards and in reverse in which universes & worlds came and went. All encapsulated in their own arrangements of the universe's entropic field + syntropic field system. The Big Bang being just a blip on the infinite time scale.
